SALTO EECA analyse itself - 2008

The aim of this short evaluation research is to give an overview on SALTO EECA Resource Centre developments. Its primary target group is those, who work within the Youth in Action Programme: SALTOs, National Agencies' and European Commission's officers. Anyway, we hope that the following information can be useful for any youth worker from Programme and Eastern Europe and Caucasus (EECA) country.

Most of data used in the following evaluation report comes from SALTO internal on-line system, that manage our web-site (www.salto-youth.net) and its functionalities. Therefore some of soft, qualitative information (like age or nationality etc.) is based only on self-assessment of the user. Other data was collected on the base of Youth Link and own, SALTO EECA statistics.

The short analysis below is only a presentation of gathered data and doesn't have ambitions to do cross-data research. Most of the conclusions honourable reader needs to make by him/herself.

Please remember, that the factual quantitative data might slightly be different from those presented below. The number of factors and data sources makes it very difficult to receive the final numbers. Anyway, the statistics and graphs give interesting overview on the Youth in Action Programme development in/with Eastern Europe and Caucasus.

If you have any questions concerning our work and statistics presented below, please contact us at: eeeca@salto-youth.net or by phone: (+48 22) 621 62 67.

Have a nice reading!

Finally we had supported **65 youth workers** from EECA region to participate in our activities (47 in 2007).

Participants gender

Among EECA participants 41 was female and 24 was male, which makes in total 2/3 woman and 1/3 man. Among Programme Countries participants, the ratio is similar: 84 female and 50 male. In 2007 the proportion was almost 50/50.

Youth Exchanges, Training and Networking, European Voluntary Service

Currently, more and more actors within youth in Action Programme ask our Resource Centre for the statistical data on the projects realised in Action 2 and 3.1. We will try to provide this data separately, when it will be ready. The information will be available on demand since April 2008.

Multipliers activities in 2007

www.salto-youth.net/eecamultipliers

The network of SALTO EECA Multipliers was created in 2004 in order to support the development of the YOUTH Programme in the Region as well as to increase its visibility and quality of realised YOUTH projects in Eastern European and Caucasian Countries.

Initially the Network gathered 20 active members of non-governmental organisations from each of 7 EECA countries. Since 2004 the Network had evolved a lot. Some people changed their jobs and withdraw, some other had joined the Network in the meantime. The experience gained during last years of Multipliers work is very valuable. Definitely it opened new perspectives and possibilities for the recent Youth in Action (YiA) Programme in EECA Region.

Nowadays the restructured Network gathers 31 youth workers from all 7 EECA countries (9 of them represents old network).

The main areas of multipliers intervention varies between the countries and individual multipliers. Different, regional realities and needs as well as diverse personal skills and abilities makes the Multipliers Network very flexible and lively. SALTO EECA believes that this approach is the only one possible on the vast area of Eastern Europe and Caucasus.

Evaluation meetings & queries - meetings and researches (international and local) concerning evaluation and impact of the Youth in Action Projects & multiplying activities.

Training Courses - own international projects within YiA Programme of Multiplier as organiser or partner as well as common / joint EVS Trainings in EECA region.

Contact Making Seminars / Partnership Building Activities / Study Visits - own international projects within YiA Programme of Multiplier as organiser or partner.

Youth Exchange - own international projects within YiA Programme of Multiplier as organiser or partner.

Info seminars – national and local level seminars, presentations, meetings with youth workers on capacity building and YiA Programme development.

Presentations at international events - presentations of the YiA Programme, SALTO and Multipliers Network as a part of wider international events.

Consultations - consultations of projects and ideas of the local youth workers by meetings, phone, e-mail, web...

Youth policy - meetings and activities with the official representatives of the youth policy sector in a country.

Networking - creating contacts with other multipliers, youth workers, youth organizations and EVS volunteers etc.

Field visits - visits to the projects within YiA Programme taking place in the country / region.

Materials publication - printed publications & articles about the youth work, YiA Programme, Multipliers Network and SALTO.

Newsletter, mailing & contact list - newsletters, databases, contact lists oriented at dissemination of the information about the Youth in Action Programme and SALTO opportunities.

Web-page - creation or development of the web-pages or sub-pages devoted to YiA Programme, SALTO and Multipliers Network.

Films & other - films, photo exhibitions, power point presentations and other electronic media on the youth work, YiA Programme and SALTO.

As practice shows, the number of people reached with information about the Youth in Action Programme doesn't necessary raise the number and quality of projects. Therefore, the general trend is to limit the number of info seminars and presentations (quantitative approach) and to focus on consultations, youth policy and networking (qualitative approach). This already brings positive changes. See more details in Annual Multipliers Meetings reports (Download section of the SALTO EECA Forum: www.salto-eeeca.eu/forum/dload.php).

SALTO EECA support for Multipliers

SALTO EECA supports the Multipliers Network in different dimensions. The most important of them are:

- annual meetings,
- multiplying costs reimbursement,
- capacity building /development of multiplier and his/her organisation,
- visibility and recognition,
- communication environment.

The Multipliers Meetings are the possibilities to evaluate the work done in previous year and plan future activities individually, in the group of local/national multipliers. Those meetings are also possibility to consult multiplying activities with SALTO EECA officers and other experts. The multipliers Meetings may contain training elements, that aim at rising the capacities of the Multipliers.

Every Multiplier is offered the multiplying costs reimbursement up to 300 euro to cover his/her expenditures. Most of Multipliers use this possibility to partly cover their multiplying activities costs. Anyway, we are aware, that this amount is only symbolic and we hope to raise it in the future and change the system of reimbursement.

During 2008 13 multipliers (11 in 2007) were supported by SALTO EECA to take part in different kind of activities organised by SALTOs and National Agencies. For the first time our Resource Centre managed to cooperate with trainers from EECA region on a quite regular basis, what brought the first EECA trainers evaluation on scene during ToolFair 3rd.

In general, the overall financial support in 2008 for the EECA Multipliers Network reached 36 000 euro (20 000 – multipliers meeting, 9 000 – multiplying reimbursement, 7 000 - 13 multipliers travel costs for activities).

SALTO EECA works on rising the visibility and recognition of the Multipliers Network. The web-site works well (www.salto-youth.net/eecamultipliers). SALTO EECA promotes the Network during different kind of meetings with National Agencies’ and European Commission’s officers as well as other stakeholders.

Moreover, SALTO EECA creates the space for communication for the Multipliers. The Network has own part of the EECA Forum (<http://www.salto.org.pl/forum/index.php?c=12>), there is common mailing list created for the members (eeca-mult@salto-youth.net), the Resource Centre consults the multipliers activities by e-mail on the regular basis.
